

SHREYAS VENADAN

Melbourne, VIC | 04 5021 9944 | shreyasvenadan10@gmail.com | [linkedin.com/in/shreyasvenadan](https://www.linkedin.com/in/shreyasvenadan) | github.com/shreyasvenadan

TECHNICAL SKILLS

Languages: Swift, JavaScript, TypeScript, Python, Java, C++, PHP, SQL, HTML5, CSS3

Frameworks & Platforms: SwiftUI, SwiftData, React, Next.js, Vite, Express, Tailwind CSS, Supabase, Tuist, AWS (EC2, S3, API Gateway, Lambda, DynamoDB), MySQL, PostgreSQL

Machine Learning: Regression, classification, neural networks, transfer learning, data augmentation, feature engineering, cross-validation

Developer Tools: Xcode, Git, GitHub, Figma, Agile/Scrum, user stories, unit testing

Creative: Photoshop, Premiere Pro, After Effects, DaVinci Resolve, Lightroom, Affinity

EXPERIENCE

SeaLens sealens.app

Co-Founder | Tech & Marketing Lead

2025 – Present

- **Co-founded SeaLens**, a macOS and web application that helps marine scientists monitor and analyse reef biodiversity by automatically detecting, tracking and classifying fish in underwater video using machine learning.
- Co-led development of the production-ready macOS application (SwiftUI, SwiftData, Tuist), integrating machine-learning outputs into a scientist-friendly workflow.
- As Tech Lead, led development of the SeaLens web app (React, TypeScript, Vite, Supabase), extending access beyond macOS so more researchers and organisations can analyse reef footage.
- Own the product's external positioning and outreach strategy as Marketing Lead.
- **Selected as a Spotlight Team** (1 of 4 across all Indonesian Apple Developer Academies); presented to **Indonesia's Minister of Industry**, the **Vice Minister of Communication and Digital Affairs**, **three Apple Directors** and the Singapore Oceanarium, one of the world's largest aquariums.
- Represented the team at executive-level showcases, including presenting directly to **Lisa Jackson, Apple's Vice President of Environment, Policy and Social Initiatives**.
- **Won 1st place** at the **EU Conexus Innovation Contest 2025**, attracting interest from marine science organisations for real-world deployment and collaboration.

Spectrum Tuition — MyKaleidoscope

Melbourne, VIC

RMIT Industry Project

2026 – Present

- Built MyKaleidoscope, a goal-tracking and personal development platform for students and adults, in Agile sprints using a full-stack TypeScript monorepo (Next.js, React, Tailwind CSS, Express, Supabase/PostgreSQL).
- Built the onboarding and Wheel of Life assessment flows with Supabase persistence, and added Google Calendar integration so users can turn goal deadlines into calendar events.

Apple Developer Institute for Entrepreneurship

Jakarta, Indonesia

Co-Founder, SeaLens (6-month program)

2026

- Apple-run program supporting early-stage startups built on Apple platforms.
- Received mentorship from an Entrepreneur in Residence, with structured learning in growth strategy, fundraising and investor pitching, and milestone-driven sprints toward commercial launch.

Apple Developer Academy @ BINUS

Bali, Indonesia

iOS Developer (10-month international program)

2025

- Selected among the **top 3% of applicants globally** for the inaugural Apple Developer Academy @ BINUS cohort.
- Relocated from Australia to work in diverse, cross-cultural teams, designing, developing and shipping multiple Apple-platform apps across **iOS**, **watchOS** and **macOS**.
- Worked across the full product lifecycle (ideation, user research, design, development, iteration and presentation) using Swift, SwiftUI, Xcode, GitHub and Figma.

PROJECTS

Machine Learning (Regression, Classification, Transfer Learning)

- Built and evaluated **regression models** (Linear, Lasso, Ridge) to predict Melbourne Airbnb nightly prices, applying **feature engineering**, **data preprocessing** and **cross-validation** to select the most effective model.
- Developed and compared **classification models** (Decision Tree, SVM, Neural Network) to predict wildfire intensity across 7 global regions, **tuning hyperparameters** and evaluating with accuracy and F1-score.
- Built a histopathology image classifier on colon cancer cell data, performing binary (cancerous/non-cancerous) and multi-class (cell-type) **classification with supervised models**, **unsupervised EDA**, **data augmentation** and **transfer learning**.

Cloud Music Subscription Service (AWS, Python)

- Developed a cloud-based music subscription service on AWS using EC2, S3, API Gateway, Lambda and DynamoDB.
- Built the Python backend integration and RESTful APIs, and managed cloud infrastructure and web application hosting.

Web Development (React, JavaScript, Java, MySQL)

- Developed multiple websites using real RMIT data in an Agile Scrum team, using sprint planning and Figma for prototyping.
- Built front ends with HTML5, CSS3, JavaScript and React, and integrated back ends using Java, MySQL and phpMyAdmin.
- Worked with user stories, acceptance tests and unit testing, using GitHub for version control and collaboration.

Secure E-Commerce (PHP, PayPal, Google Pay, reCAPTCHA)

- Built secure e-commerce applications in PHP, integrating PayPal, Google Pay and Google reCAPTCHA for payment and access security.
- Conducted vulnerability assessments and simulated attacks to identify and mitigate security threats.

EDUCATION

Royal Melbourne Institute of Technology (RMIT)

Software Engineering

Melbourne, VIC

2022 – Expected November 2026

Nossal High School

Academically selective entry school (1 of 4 in Victoria)

Berwick, VIC

2020 – 2021

ADDITIONAL EXPERIENCE

Youth Football Coach — Berwick Churches Soccer Club, Berwick, VIC

- Coached children aged 8–12 in fundamental and advanced football skills, adapting communication styles and giving personalised guidance.

Photography & Videography: Photo and video production for YouTube using professional-grade equipment.

Football: Competitive player for 14+ years; competed in interstate tournaments and won multiple trophies and medals.

Languages: English (native), Malayalam (fluent)
